Title: Senior Server Developer
Location: Las Vegas, NV

Phoenix Staff is known for connecting highly qualified candidates with highly desirable jobs. We are currently looking for a Senior Server Developer to join an exciting and innovative gaming company in Las Vegas. As part of the development team, you will be directly involved with extending current products to the latest technologies as well as designing and implementing cutting edge new applications centered around sports and gaming.

Your role:
- Primarily server application design and implementation
- Developing designs from business specifications
- Coding against designs
- Code reviews and championing of best practices
- Bug fixing and enhancements
- Developing low level project plans for your tasks

What you've got:
- Experience with multi-threaded applications
- Experience supporting legacy applications
- Server side experience using socket communication, Spring, Hibernate, BlazeDS, JMS a plus
- Sports betting experience highly valuable (either professional or non-professional)
- Must be familiar with Client Server architecture
- Ability to quickly learn and adapt to new technologies
- Experience with scalability and/or online systems a plus
- Effective communications skills
- Motivated and able to overcome unique challenges independently
- Must be available to work in the U.S.

Prove it!
- 3+ years experience in Java server development required
- 2+ years in PHP development required
- College degree or work experience equivalent required
